EDUCATION

University of Florida

M.S. in Computer Science, GPA: 3.9 / 4.00

SRM Institute of Science and Technology

B.Tech in Computer Science with Specialization in Big Data Analytics, GPA: 8.55 / 10.00

Aug. 2024 – May 2026

Gainesville, FL

Sept. 2020 – May 2024

Kattankulathur, TN

EXPERIENCE

Backend Software Engineer

Wildlife Ecology and Conservation Department, University of Florida

Jul. 2026 – Present

Gainesville, FL

- Implemented a **Node.js** scheduling service for **Snapper GPS** devices, improving battery life and storage utilization by **~50%**.
- Designed **REST APIs** to process **JSON**-based configuration updates and dynamically control device wake/sleep intervals.
- Enhanced backend reliability by testing, debugging, and maintaining communication between the server and embedded **GPS firmware**.

Software Engineer

University of Florida

Jan. 2026 – Apr. 2026

Gainesville, FL

- Built a production **Flutter** iOS/Android app with **role-based dashboards**, onboarding **200+ users** and **120 food providers** in Palm Beach County
- Designed a **RAG chatbot** with **pgvector** semantic search and **Llama-3.1-8B / Mistral-Small-3.1** fallback for grounded provider recommendations
- Architected a **FastAPI + PostgreSQL** backend with normalized schema and **PostGIS** proximity search, cutting query latency up to **30%**
- Migrated backend from **AWS (EC2, RDS)** to **Supabase**, using managed **PostgreSQL**, **Edge Functions**, and built-in auth to cut setup time **40%**

Software Engineer

Axisxi

Jun. 2023 – Jul. 2024

Bengaluru, Karnataka

- Built **10+ RESTful API endpoints** in **Java/Springboot REST Framework** for authentication, data retrieval, and transaction workflows, serving **3,000+ users**.
- Optimized **MySQL** schemas and tuned slow queries with **indexing** and refactoring, cutting average response time by **~30%** on high-traffic endpoints.
- Integrated **Redis caching** and third-party **REST APIs** to reduce database load and improve reliability, supporting **40,000+ requests/day** in production.
- Shipped features in an **Agile** team via **Docker** and **CI/CD**, writing **unit/integration tests** and debugging production issues across client and internal platforms.

PROJECTS

LedgerFlow | *Python, FastAPI, PostgreSQL, SQLAlchemy, Docker, REST APIs, Pytest, Locust*

Apr. 2026

- Built a payment ledger backend in **Python** using **FastAPI** and **PostgreSQL**, implementing **double-entry accounting** for transaction posting, balance tracking, and ledger history
- Added concurrency-safe transaction posting with **PostgreSQL row-level locking** and **idempotency-key** support, benchmarking **340 req/s** with **56 ms p99** latency

Full Stack Housing Platform | *Go, React, NLP*

Jan. 2025 – Apr. 2025

- Built and deployed a full-stack web app for **1000+ users** to find housing and roommates via personalized filters, **Google Maps** integration, and **NLP**-powered property summaries.
- Engineered **RESTful APIs** in **Go** with filtering by rating, area, name, and university proximity, improving search precision by **40%**

TECHNICAL SKILLS

Languages: Python, SQL, Go, Pony, JavaScript, TypeScript

Frameworks & Libraries: FastAPI, Django, React.js, SQLAlchemy, Pandas, NumPy, scikit-learn, LangChain

Databases: PostgreSQL, MongoDB, pgvector, PostGIS, MySQL, Redis

Cloud & DevOps: AWS, Supabase, Docker, Vercel, Render

Tools & Platforms: Git, Postman, Locust, Power BI, Tableau

Concepts: REST APIs, Distributed Systems, Concurrency Control, RAG, NLP, Machine Learning, Agile
